www.ClearClickSoftware.com

### **Minimum System Requirements:**

- PC w/ Windows XP, Vista, or 7/8
- CD burner
- Blank CD's (CD-Rs recommended)
- 1-2 GB free disk space

NOTE: If you are using the ClearClick® Direct2Digital® Converter, you can skip steps 1 and 2 of the Wizard, because the converter transfers audio without your computer. Instead, skip to step 3 of the Wizard to clean your recordings, or skip to step 6 to burn an audio CD.

#### Installing the Software:

Insert the CD into the computer and run the installation program when prompted. When complete, a new icon will appear on your desktop like this:

#### Using LP2CD Wizard<sup>™</sup>:

Double click on the desktop icon to launch the program.

The initial screen will appear and remind you to complete the steps above before the recording process can begin.

LP2CD Wizard 2.02		- X
Welcome!		
	Let's get started transferring your record to CD or MP3! Before continuing, please make sure that you've connected your Vinyl2USB Converter or other audio source to your PC. Click "Next" when you're ready.	
	Or jump directly to one of the steps below:	
	Record Audio Edit Recording Burn CD	
2 2 0 32615	Help Me! Register For Updates Next >	•

After verifying that you have everything connected, click **Next;** or click on of the *Jump* buttons to proceed to a specific step.

#### **Testing for Audio:**

On this screen, select "USB Audio Device" or "USB Microphone Array" for the Recording Device. Once you start playing a record on your converter, you should have movement on the sound level indicator.

Step 1: Audio Source	- x	
If you are recording from the Viny	u'd like to record from and set the recording level. /2USB Converter, your device should be set to something like "USB Audio." nputer's sound card, please use your computer's "Line In" jack and choose that setting	Click <b>Preview Audio</b> to hear the currently playing record.
THE ME	Recording Device:	Adjust the Recording Volume slider until you can judge that the level is high enough. Click <b>Next</b> to continue.

Tracks are identified by the spaces or gaps of silence between songs.

Note: (Tracks may remain unselected if a clean break cannot be found.)

When *Automatically Detect Tracks* is selected (Step #2), the Wizard creates tracks based on the gaps between songs.

#### **Editing and Cleaning the Recording Manually:**

Note: If you have trouble picking up either the starting line or ending line; hover your mouse over the border until it gives you the double headed arrow, then click and drag.

Resize the track until you have encompassed the entire song. Then click the **New Track** button again to highlight the recording and resize the selection for the next song.

The "Red Line" is a ruler to let you know where in your recording you are located.

#### Noise Removal:

Some records develop noise over time as they are played often. The Noise Removal filter can help remove these before saving or burning.

Click the Noise Removal button to start the process:

Simple Noise Removal	
The software will try to automatica	lly remove noise.
Advanced Noise Removal	
Advanced Noise Reinoval	
Click the "Select Pause" button and contains silence besides clicks/poj beginning of your recording). Then again and click "Remove Noise".	ps/noise (for example, at the
Click the "Select Pause" button and contains silence besides clicks/poj beginning of your recording). Then	ps/noise (for example, at the

You can choose to allow the Wizard to remove the noises from the recording automatically or manually.

If you choose the advanced option, you will click the **Select Pause** button then click and drag a selection of the wave form that is from either a gap between songs or the beginning or end of the recording.

Once you have the option of your choice selected, click the **Remove Noise** button.

This meter bar will appear until the process is complete.

**Note:** Noise Removal is for the removal of repetitive noises, not to change the quality of the recording.

If the removal affected the recording in a bad way, click the **Reset Changes** button to undo the changes.

#### Naming Your Songs:

LP2CD Wizard 2.02				- X
Step 4: Song Names				
Please tell the Wizard the details	of the record that you just tra	nsferred.		
If you have cover art for the album	, you can select it by clicking	the "Browse" button.		
		Track 1		
	Track #	1		
	Song Name			
	Artist Name			
8 III	Album Title			
	Name Format	Album Name - Artist Name - Song 👻		
	Release Year	1900 -		
	Genre	Blues -		
	Cover Art		Browse	
< Back 2.2.0.23815	Help Me!	Register For Updates		Next >

Here you can add song names, artist names, titles, and other information about the tracks you have just made.

Enter the information for the track and then use the track navigation buttons to go to the next track to enter its information.

After you have all the track information entered, click the **Next** button.

**Note:** The LP2CD Wizard is designed primarily for commercial records. The Artist Name and Album Title fields will automatically copy to each track for consistency.

For "homemade" or "various artist" type records, we recommend leaving the Artist and Album fields blank and then updating this information in your favorite audio editor or Windows Explorer.

#### Saving the Audio Files:

IP2CD Wizard 2.02  - ×    Step 5: Save Audio	
We're almost done!      To save your transferred audio as MP3 files, click the "Save Tracks" button below. You can also save in WAV audio format.      If you also want to burn an audio CD of the tracks that you just transferred, click the "Burn Audio CD" button.      Save Tracks as MP3 Audio Files      Save Tracks as MP3 Audio Files      Burn Audio CD	
< Back      Help Me!      Register For Updates      Next >        2.2.0.23815	

You can choose to save your Audio Files as MP3s, WAVs, or burn them directly to an Audio CD.

If you choose to save them as either an MP3 or a WAV file, you will be prompted to choose a destination folder. The Music Library (or My Music) folder would be the preferred location, but the Desktop will make your files the easiest to locate. They can always be relocated later.

### **Frequently Asked Questions/Troubleshooting:**

#### Q. The CD is reported as "not empty" even though it is brand new?

a. This can happen when another CD burning program is on the computer and has control of the CD Drive. To correct this, insert the blank disc **BEFORE** you launch the Wizard to start your recording session and close any Auto-Run window that may open up. If you currently have a recording created, use the **Back** button to save your audio as MP3 or WAV then start the Wizard program over and click Burn CD on the Welcome screen.

# Q. I have created tracks for my spoken word recording, but there are noticeable gaps in the recording, why?

 Our program places the industry standard 2 second gap between tracks as it burns them onto a CD so that the CD will skip tracks like a commercial CD. For spoken word it is best to create a single track that encompasses the entire recording.
